ABOUT

I'm a 5th semester Computer Science student with a passion for machine learning, data science, and app development. I love exploring the fascinating world of machine learning algorithms and techniques to solve complex problems. Additionally, I enjoy delving into data science, extracting valuable insights from large datasets. In my free time, I indulge in blogging about machine learning. I have made over 8 projects and all the projects are available in my github.

EXPERIENCE

Fakultas Ilmu
Komputer
2021-Now

Lab Assistant

I am proud to have taught more than 120 students. Teaches **Basic Programming, OOP, Algorithm and Data Structure** and **Computer Network** courses.

Tech Stack : Java, Linux, Algorithm, Data Structure, OOP

BEM FILKOM UB
2023

Staff at HOLOGY Event (national competition)

I am a staff member of the competition division, CTF subdivision. I am in charge of building infrastructure for the CTF competition, and setting up local network for final competition.

Tech Stack : Linux, CTFd, Networking

EDUCATION

Brawijaya University
2021-Now

Computer Science Student

SKILL

Hard Skill

Java
Python
Kotlin
Html
Css
Js
Linux
Git
SQL
Querying

Soft Skill

Communication
Problem-solving
Adaptability
Teamwork
Time management
Attention to detail
Continuous learning

Language

Indonesia (Native)
English (Fluent)
